

Payments Excellence

Consulting, software and services for all aspects of payments

PPI is the European market leader in the field of payments. We offer payments solutions on-premises or as a service with operation in the cloud and realise end-to-end solutions for the entire payments process from a single source with our standard software products.

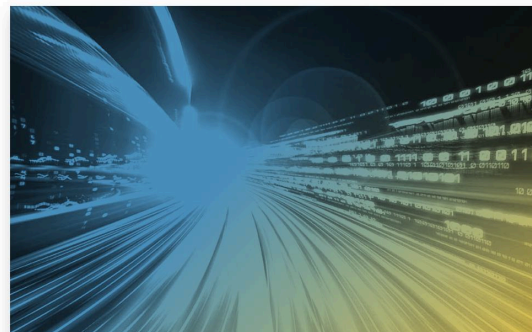

We are the leading provider of EBICS and FinTS solutions. As members of a broadly-based consulting company, our payments experts cover all strategic, IT and bank-technical areas. We provide high-quality, independent advice for financial institutions, financial service providers and insurance companies.

Current topics

Consulting

Instant payments as a mandatory function – ready for implementation?

Europe's financial institutions**

Consulting

Solution-oriented consulting

The experts in the PPI payments division advise financial service providers on all strategic, IT and banking-related fields of action all around payments. They create pragmatic solutions for pan-European payments of tomorrow that can be implemented in the given time and, above all, are future-proof.

Products

Software products in perfection

Many national and international financial service providers already rely on the TRAVIC suite by PPI, the European market leader in EBICS and FinTS solutions, for payments processing. Thanks to the interoperability and easy integration into existing IT architectures, users can select the programmes they need precisely.
